

Available Now!

PenNote is an intuitive, easy-to-use and helpful program to manage handwritten notes created with the Pegasus Mobile NoteTaker. With PenNote, you can:

Manage Notes on the Mobile NoteTaker Device

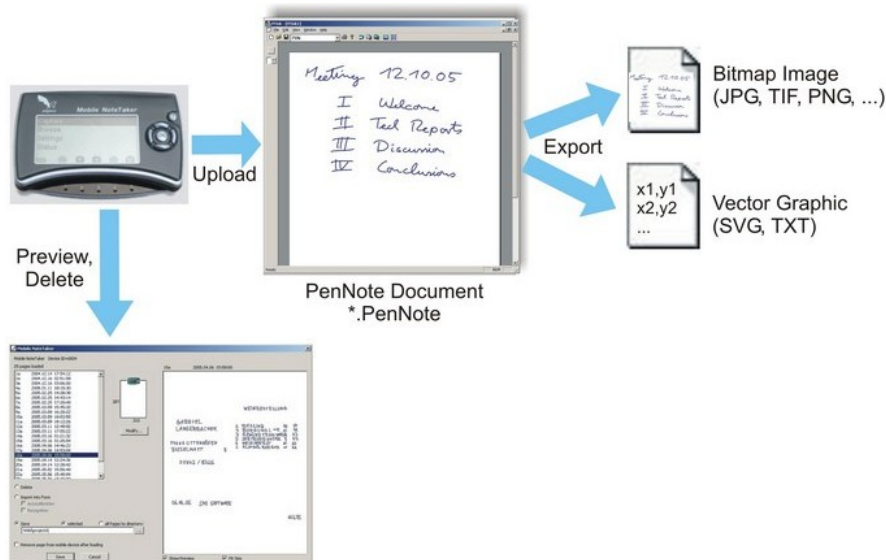

- Preview notes on device before uploading individual pages
- Save each note in a separate file as *.penNote document
- Delete individual notes on the device from your PC
- View your notes by simply double-clicking the corresponding *.penNote file

Export Notes as

- Bitmap image (jpg, tif, png, etc)
- Vector graphic (svg, txt)
- Email
- Copy and Paste in MS Office Programs

Edit and Enhance Uploaded Notes

- Add a background image to the handwriting
- Resize and reposition your handwriting
- Change color, pen width, and smoothness of ink

PenNote can manage, enhance, modify and export notes in various Formats. However, no text recognition is performed. For more advanced tools to design and recognize forms filled with the Mobile NoteTaker, please have a look at the FormFiller application.
